TYPES OF GLASS

WHAT'S THE DIFFERENCE?

Annealed Glass is a softer glass that has been thermally treated and then slowly cooled to relieve any internal stresses. Annealed glass tends to break into longer, jagged shards which can cause significant injury. This glass is more cost effective than other types of glass. Annealed glass can be cut, drilled, notched and edge finished.

Tempered Glass is manufactured through a process of extreme heating and rapid cooling, making it much harder and stronger than annealed glass. Another benefit of tempered glass is the ability to stand up to moderate heat (470°F).

In general, tempered glass is four times stronger than annealed glass and if tempered glass breaks, it breaks into small pieces (shatters) and is less likely to cause injury. All fabrication needs to be done while the glass is in the softer, annealed condition. Tempering is only done once the shaping and fabrication is complete.

Laminated Safety Glass takes the idea of safety glass a step further. Laminated safety glass is made by adhering two pieces of annealed glass together with a vinyl interlayer. The vinyl layer holds the glass together if the glass is broken or impaled, making this a much safer alternative to regular annealed glass.

TEMPERED GLASS USAGE

Common situations where tempered glass is required are:

- 1 Glass in any fixed or operable door. This includes entry doors, storm doors and patio doors.
- 2 Glass in fixed or operable panels adjacent to a door where the nearest vertical edge of the glazing is within a 24" arc of either vertical edge of the door in a closed position and where the bottom edge of the glazing is less than 60" above a walking surface.
- 3 Glass in fixed or operable windows that meet **ALL** of the following conditions:
 - Bottom edge is less than 18" above the floor
 - Top edge is greater than 36" above the floor
 - Total area of each pane of glass is greater than 9 sq. ft. (1,296 sq. in.)
 - One or more walking surfaces within 36" horizontally of the glazing

You can choose tempered glass for most windows you order from ProVia®, even if it is not required.

Tempered glass usage requirements vary by state. Please check local building codes for exact usage requirements.

ANATOMY OF AN ENERGY EFFICIENT INSULATED GLASS UNIT

When ordering glass for windows, you can choose single, double or triple strength glass.

SINGLE STRENGTH

2.5mm or 3/32" panes
Available in Annealed Only

DOUBLE STRENGTH

3mm or 1/8" panes
Available in Tempered or Annealed

TRIPLE STRENGTH

5mm or 3/16" panes
Available in Tempered or Annealed

* Laminated glass is available in multiple pane thicknesses.

SUPER SPACER®

BETWEEN YOU AND THE ELEMENTS

Warm edge technology is more than just a low-conductive product that helps make insulated glass units more thermally efficient. The warm edge spacer is the seal that keeps the glass package in windows and doors from failing. Super Spacer is a dual-seal insulating glass system. This non-metal, structural foam spacer resists condensation, reduces energy costs, provides long-life durability and adds both comfort and value to your doors and windows.

Super Spacer is better able to ensure NFRC ENERGY STAR® certification by providing the best thermal conductivity, the lowest U-Factor among dual-seal systems and the best durability available in the industry. The all-foam formula blocks the heat escape path, improves sound absorption over traditional metal spacers and lasts up to nine times longer in durability tests than single-seal units. The all-foam formula reduces the effects of temperature changes, barometric pressure, wind load and glazing pressure, resulting in less seal failure and fewer stress cracks.

The warmest edge among dual-seal systems

up to +14.4°F/8°C warmer temperature at the edge of the glass

Super Spacer has been tested and has met the following global standards:
 North America E2188 / E2189 / E2190 | European EN 1279 | Canadian CGSB 12.8
 | ASTM E330 (120* psf positive, psf negative) French Standard CSTV for CEKAL |
 Passive House pH+ certificate for Artic climate | Industry type P-1 testing

The No-Metal Advantage

Thermal efficiency through no presence of conductive metals is the Super Spacer hallmark.

Mylar 10-Layer Vapor Barrier

The Super Spacer thermoset foam matrix is exceptional. Moisture is kept out, gas is kept in and conductivity is virtually nonexistent.

Lasting Appearance

The Warm Edge Glazing System stands up to the natural bending and bowing from temperature changes, barometric pressure and wind load.

Enhanced Noise Reduction

The all-foam formula's excellent sound dampening properties reduce outside noise, even in industrial environments.

Strength

The P-1 test, the world's toughest IG durability test, exposes units to 140°, 95-100% humidity and constant UV bombardment. Each week of testing is approximately equivalent to one year of field use, and Super Spacer survives with long term P1 performance with a low seal failure history.

- Super Spacer backed with hot melt butyl
- Butyl spacer backed with silicone
- Aluminum spacer backed with silicone
- Aluminum spacer
- Butyl spacer

GLASS CONDENSATION

Many energy efficient windows and doors have glass packages with “warm edge technology.” The problem is highly conductive metal-based insulating glass spacers are often used in these new windows and doors. A new window can lose up to 50% of its overall stated R-Value with a metal-based spacer at the edge of the glass. “R” stands for the “resistance” of the transfer of heat or cold through a solid object. So, a higher R-Value means better insulation against heating and cooling loss.

The edge of the insulating glass is the most vulnerable to heating and cooling loss. This usually leads to condensation. It’s a problem that looks unsightly, and over time, it will stain wood, peel paint and rot frames. Not only that, but window condensation can contribute to mold growth.

THE SOLUTION

Reduce condensation on the glass with the warmest inside surface temperatures possible.

The primary glass condensation culprit is its insulating spacer. Traditional metal spacers can conduct heat and cold, causing condensation at the edge of the glass. Convection currents further concentrate cold air along the bottom edge of the glass, making that area the most vulnerable. However, a warmer edge all the way around will strike at the heart of the problem.

The only truly “warm edge” occurs with Super Spacer®, an insulated foam spacer whose use helps reduce condensation and allows for comfortable household humidity levels. Remember, even doors and windows with a warm edge spacer are prone to condensation when there is excess humidity in your home.

A FEW TIPS FOR REDUCING HUMIDITY INCLUDE:

- Using exhaust fans in your kitchen, laundry and bathrooms
- Venting gas burners, clothes dryers, etc. to the outdoors
- Shutting off all humidifiers
- Opening louvers in your attic and basement crawl spaces
- Opening fireplace dampeners to allow an escape route for moisture-laden air
- Airing out your house a few minutes each day

Full Metal Spacer

With conventional metal spacers, condensation is a fact of life.

Less Metal Spacer

Mid-performance spacer systems that still contain metal will improve condensation resistance.

Non-Metal Super Spacer®

All-foam design dramatically reduces interior condensation, delivering a clear view.

GLASS PACKAGES

ComforTech™ **TLK-UV**

R-Value of 9

The best value in energy savings! This glass package has high performance Low-E coating applied to two panes of glass. Both insulating chambers are filled with Krypton gas.

ComforTech™ **TLA-UV**

R-Value of 6

Combat cold weather with this triple glazed package. High performance Low-E coating is applied to two panes of glass. Both insulating chambers are filled with Argon gas.

ComforTech™ **DLA-HC**

R-Value of 5

Enhanced double glazed, Argon filled glass package with high performance Low-E coating applied on one pane of glass and Energy Advantage™ Hardcoat Low-E on the other pane of glass. The hardcoat increases UV protection and has SHGC retention.

ComforTech™ **DLA-UV**

R-Value of 4

Double glazed glass package with high performance Low-E coating applied to one pane. Insulating chamber is filled with Argon gas.

ComforTech™ **DC**

R-Value of 2

Baseline double glazed glass package, with two panes of clear glass and the air space acting as an insulator. No Argon gas.

Other glass packages available:

- | | | |
|-----------|-----------|-----------|
| DLA | TLA-HC | TLK-HC |
| DLA-UV-HC | TLA-UV-HC | TLK-UV-HC |
| TLA | TLK | |

ComforTech™ Elevation Series *for customers in high altitude areas*

Insulated glass without Argon or Krypton. Capillary tubes are open and inserted behind glazing bead. Low-E softcoat and hardcoat available for vinyl windows and vinyl patio doors.

ComforTech™ **TLE**
 ComforTech™ **TLE-UV**

R-Value of 5

ComforTech™ **DLE**
 ComforTech™ **DLE-UV**

R-Value of 3

ComforTech™ **DE**

R-Value of 2

Some Elevation Series (TLE-UV, TLE, DLE-UV and DLE) glass offerings require a hardcoat option to be ENERGY STAR® compliant.

Understanding the Acronyms

- | | |
|--------------------------|-------------------------------|
| T - Triple Glazed | K - Krypton |
| D - Double Glazed | E - Elevation (no gas) |
| L - Low E | UV - Ultraviolet |
| C - Clear | HC - Hard Coat |
| A - Argon | |

R-Value reflects center of glass data only. Actual window unit R/U values will vary based on the window package chosen.

NFRC LABEL

WHAT YOU NEED TO KNOW

ENERGY STAR® Certified in All 50 States			
			
		ProVia Endure 601- Double Hung Comfortech DLA-UV Double Glaze - Low-E w/Argon/UV Frame: Vinyl	
ENERGY PERFORMANCE RATINGS			
A	U-Factor (U.S./I-P) 0.27	Solar Heat Gain Coefficient (SHGC) 0.20	B
ADDITIONAL PERFORMANCE RATINGS			
C	Visible Transmittance 0.48	Air Infiltration (cfm/ft²) ≤0.3	D
E	Condensation Resistance 61		
<small>Manufacturer stipulates that these ratings conform to applicable NFRC procedures for determining whole product performance. NFRC ratings are determined for a fixed set of environmental conditions and a specific product size. NFRC does not recommend any product and does not warrant the suitability of any specific use. Consult manufacturers literature for other product performance information. - www.nfrc.org</small>			

For example purposes only. Numbers will vary based on the window package chosen.

- A U-Factor** – Insulating value of the entire window system. Lower numbers reflect better insulating value.
- B Solar Heat Gain Coefficient (SHGC)** – Amount of heat from the sun passing through the glass. Lower numbers indicate glass is keeping heat from entering your home. SHGC is measured on a scale from 0 to 1.
- C Visible Transmittance** – Amount of visible light passing through the glass. Higher numbers indicate glass is allowing more light to enter your home. Visible transmittance is measured on a scale from 0 to 1.
- D Air Infiltration** – How much air is entering or escaping through the window. The number shown represents the maximum air infiltration allowable by NFRC listings.
- E Condensation Resistance** – Amount of moisture it takes for glass to condensate when exposed to extreme interior and exterior temperature changes. Higher numbers indicate better resistance to condensation. Condensation resistance is scored on a scale of 0 to 100.

ENERGY STAR®

WE'VE GOT YOU COVERED...NO MATTER THE CLIMATE

There are some important things to note about what makes a door or window ENERGY STAR certified.

ENERGY STAR certified windows and doors:

1. Are manufactured by an ENERGY STAR partner
2. Are independently tested, certified and listed by the National Fenestration Rating Council (NFRC)
3. Have NFRC ratings that meet voluntary energy efficiency guidelines set by the U.S. Environmental Protection Agency (EPA)

Though ENERGY STAR does not require any specific technologies, certain product features are common in many certified products.

Windows and doors protect you from the elements just like a winter coat. But like a winter coat, you should pick the windows and doors that make the most sense for your climate. While some are better at keeping you warm, others excel at keeping you cool.

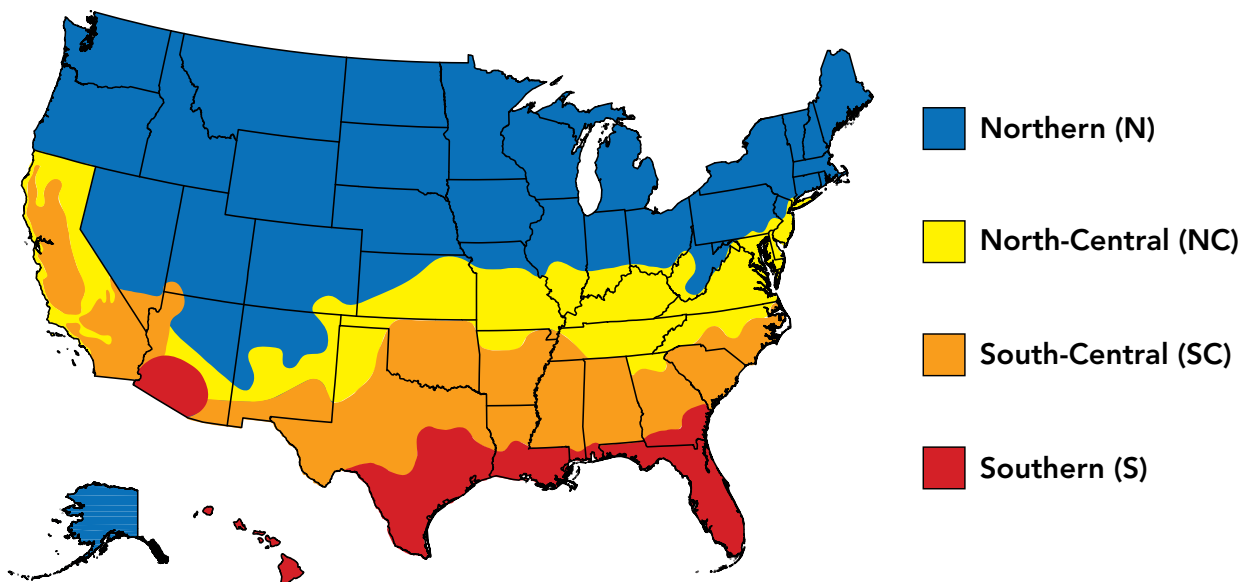

Doors are a little different. Many doors don't have any glass (like your front door), but even doors with lots of glass (like a sliding patio door) have lower glass-to-frame ratios than windows or skylights. This means doors can provide more insulation than a window or skylight. Performance criteria for doors are based on the amount of glass they have (glazing level) and ratings listed by the National Fenestration Rating Council (NFRC).

ENERGY STAR REQUIREMENTS

WINDOWS

CLEAR GLASS

Clear Glass is a traditional option that looks fresh and stylish on every window and door, bringing simple elegance to your home's curb appeal. Practical and classic, clear glass offers unobscured views through exterior doors and windows, allowing for full views of your property. Most ProVia® clear door and window glass packages with the ComforTech™ Glazing System meet ENERGY STAR® certification for energy efficiency.

INTERNAL BLINDS

Internal blinds are a convenient option for blocking harsh sunlight and increasing privacy on entry doors, patio doors and windows.

Constructed with sturdy aluminum and enclosed in tempered safety glass, the blinds are protected from weathering, damage, and dust, and they are not a hindrance to cleaning your glass.

BLIND OPERATORS

Blind operator as viewed from the interior of your home.

Blink® Blinds

White internal blind operator for entry and patio doors

Internal blind operator for windows and all colored blinds

Internal blinds are available in white plus four neutral hues to complement any room in the house.

AVAILABLE COLORS

White

Cream

Tan

Silver

Champagne

White internal Blink blinds for entry doors have a 20-year warranty.

White internal Blink blinds for sliding patio doors and white blinds for windows have a 10-year warranty.

Colored internal blinds for all window and door products have a 10-year warranty.

Colored internal blinds not available in sidelites.

All entry systems with Internal Blinds can be ENERGY STAR® Certified depending on the glazing system you choose. This chart indicates which glazing system is required for ENERGY STAR certification, as well as availability.

PRIVACY GLASS

Privacy glass ensures a high level of obscurement but allows soft light to filter in and illuminate a space.

These photos were taken with objects directly behind the privacy glass in a well-lit space. Actual privacy levels will vary depending on your distance from the glass and also the amount of light in the room in comparison to the light outside your home.

For extra privacy, contact customer service to add an extra pane of privacy glass to your door or window order.

DECORATIVE GLASS

Decorative glass is unique in that it achieves its personality and beauty through aesthetic imperfections – waves, striations, and air bubbles that create natural effects and singular characteristics. ProVia® decorative glass mimics the hand-made sheet glass of centuries past, and these stunning ornamental designs elevate the look of entry doors and windows, boosting the curb appeal of your home.

All ProVia decorative glass designs include the ComforTech™ Warm Edge Glazing System, which measurably improves its thermal performance and energy efficiency. Impact Shield laminated glass reinforcement is available as an upgrade, fortifying the decorative glass to withstand windborne storm debris and repeated blows.

THE PROCESS OF CREATING GORGEOUS DECORATIVE GLASS

Creating beautiful decorative glass is a multi-step process. Glass panels are hand-cut by experienced craftsmen; for more ornate styles, a high-pressure water jet precisely carves the intricate designs and facets. A beveling machine gently grinds and polishes the glass, creating a soft sloped edge, and imperfections are smoothed using a polishing grinder.

Next, the decorative pattern is printed onto a template; the artist matches the cut glass pieces and coming to the pattern, then solders them together at all joints. Flux is carefully applied to the surface of both sides of the panel and soldered to ensure superior hold and durability.

The complete panel is then inserted between two panes of clear glass to create a structurally stable insulated glass unit – beautiful artistry on the inside, and strength and energy efficiency on the outside.

Watch the Decorative Glass creation process here!

ART GLASS

A ProVia® exclusive, Art Glass offers you an opportunity to create a unique artistic statement using design and color. Your door and window glass can reflect the inspiration of your creative vision and allow you to display an original piece of art with beautiful curb appeal.

DESIGNS

An assortment of exquisite classic and contemporary ornamental patterns are available. Choose from a diverse collection of Art Glass designs – some patterned from styles in our Decorative Glass collection – and fill with your choice of color. Or create a custom, personalized design of your own.

RESIN BEAD

The design pattern is created via computer software, and a CNC machine then precisely applies a resin bead to the glass surface in one of five classic colors – Black, Silver, Gunmetal, Clay, and our newest shade, Bronze.

COLOR FILL

Select from a full palette that closely matches our beautiful Standard and Trending colors to fill the design. The opaque quality of these rich colors on the glass produces an intense, vibrant, and original work of art on your home.

OUR GUARANTEE

The resin bead and color fill are backed by our **Lifetime Limited Warranty**, and will not fade, blister, or peel away from the glass.

HOW TO DESIGN A UNIQUE PIECE OF ART GLASS

- Using **entryLINK™** or the **ProVia app**, create a door or window configuration, then select "**Art Glass**" as the glass type.
- Choose an Art Glass **design** that suits your unique style.
- Pick a complementary or contrasting **resin bead color**.
- Choose from four elegant **privacy glass options**, or **clear glass**.
- Select **colors** to fill in the design.
 - Select hues from ProVia **Standard** and **Trending** color palettes. Clear Fill and No Fill may also be chosen as well as custom colors.
 - Color placement and number of colors is pre-determined and will render as you choose them. **Picture this as a color-by-number system!**

Experiment with various color combinations until you find the perfect match for your home.

The colors shown on each Art Glass page are just examples – **the combinations you choose are completely up to you**. This program gives you complete artistic freedom to design a unique Art Glass creation.

↗ Denotes Trending Color

Always refer to our color selector for accurate color representation.

Privacy glass is tempered for safety and this process may cause minuscule surface waves on the glass. Since the surface is not completely flat, the color fill may migrate toward lower points in the glass, resulting in varied saturation levels on the surface.

RESIN BEAD COLORS

Black

Clay

Silver

Bronze

Gunmetal

AMERICANA

ART GLASS

Nostalgic and heartfelt, this rustic symbol of American pride and independence is beloved and endearing.

Americana is shown on Chinchilla privacy glass. **Three color options** can be chosen for this design.

BLOSSOMS

ART GLASS

Pastoral and pleasing, the delicate blossoms and tendrils of this design are reminiscent of a lovely garden.

Blossoms is shown on Obscure privacy glass. **Two color options** can be chosen for this design.

SANDSTONE

FOREST GREEN

BROOKHAVEN

ART GLASS

Clean lines and classic, simple patterns come together in this tasteful design.

Brookhaven is shown on Obscure privacy glass. **Two color options** can be chosen for this design.

CARLISLE

ART GLASS

Romantic and beautiful, this graceful and charming design evokes warmth and hospitality.

Carlisle is shown on Gluechip privacy glass. **Three color options** can be chosen for this design.

CAFÉ CREAM

MOUNTAIN BERRY

GOLDENROD

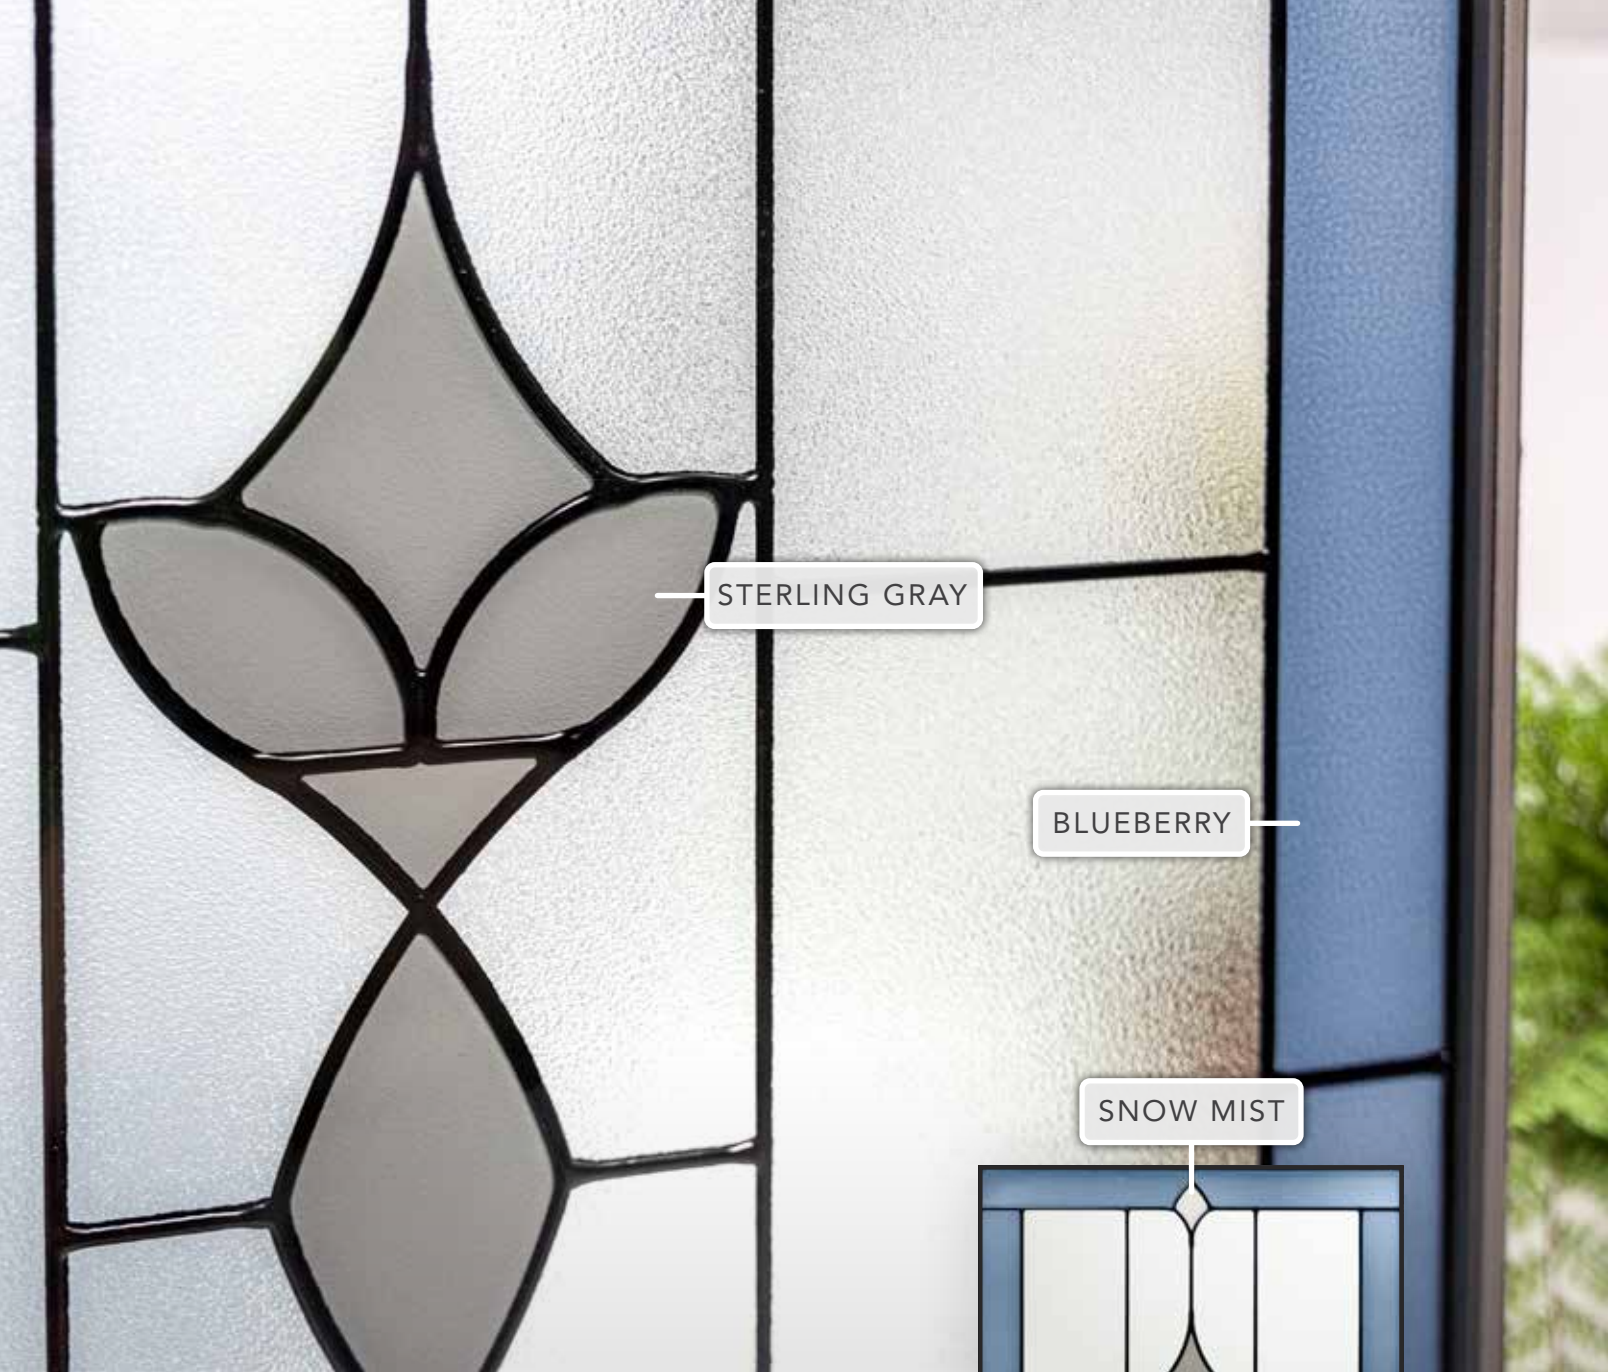

ECLIPSE

ART GLASS

Ornamental facets and strong lines give this classic design a refined aesthetic.

Eclipse is shown on Gluechip privacy glass. **Three color options** can be chosen for this design.

ESMOND

ART GLASS

Ornate and enchanting, this art glass style recalls old-world craftsmanship.

Esmond is shown on Obscure privacy glass. **Three color options** can be chosen for this design.

SANDPIPER BEIGE

ENZIAN BLUE

FLORENCE

ART GLASS

Traditional and time-honored, this stately design brings elegance and drama to any door or window.

Florence is shown on Chinchilla privacy glass. **Two color options** can be chosen for this design.

GEMSTONE

ART GLASS

Smooth lines and diamond-shaped silhouettes combine for a handsome, contemporary look.

Gemstone is shown on Clear glass. **Two color options** can be chosen for this design.

AVOCADO

HIBISCUS

ROBIN EGG

CAFÉ CREAM

HARBOR

ART GLASS

Nautical and nice, this coastal-themed artwork calls to mind the sun and fun of a beautiful beach day.

Harbor is shown on Clear glass. **Four color options** can be chosen for this design.

HAVEN

ART GLASS

Reminiscent of cathedral glass, the smooth curves and ornate flourishes of this pattern combine for a graceful design.

Haven is shown on Gluechip privacy glass. **Four color options** can be chosen for this design.

NIGHTFALL

PLUM

LAURENCE

ART GLASS

Geometric and ordered, this classic alignment of straight edges and boxy shapes is handsome and elegant.

Laurence is shown on Clear glass. **Two color options** can be chosen for this design.

BURNT ORANGE

CLOVER

GOLDENROD

MOSS

LINCOLN

ART GLASS

Reminiscent of Arts & Crafts-style architecture, this straightforward design is simple, clean, and timeless.

Lincoln is shown on Obscure privacy glass. **Four color options** can be chosen for this design.

— COAL BLACK

MANHATTAN

ART GLASS

Streamlined, artsy and contemporary, this design has a decidedly modern and sophisticated feel.

Manhattan is shown on Obscure privacy glass. **One color option** can be chosen for this design.

MOSS

CLAY

SANDPIPER BEIGE

SOMERSET

ART GLASS

Refined and elegant, the ornate blossom in the center and cutting-edge outlines give this design a polished look.

Somerset is shown on Taffeta privacy glass. **Three color options** can be chosen for this design.

TACOMA

ART GLASS

The arrow-shaped pattern of this robust design evokes a uniquely southwestern vibe.

Tacoma is shown on Chinchilla privacy glass. **Two color options** can be chosen for this design.

TRANQUILITY

ART GLASS

Intricate and stately, this complex yet refined pattern exudes a traditional ambience.

Tranquility is shown on Chinchilla privacy glass. **Three color options** can be chosen for this design.

VERSA

ART GLASS

Energetic and lively, this bold design incorporates arcs of color for a contemporary expression.

Versa is shown on Taffeta privacy glass. **Three color options** can be chosen for this design.

VINTAGE

ART GLASS

This classic design evokes the stained-glass styles of yesteryear; simple diamond shapes enclosed in straight lines and rectangular boxes form a pleasing pattern.

Vintage is shown on Gluechip privacy glass. **Four color options** can be chosen for this design.

WESTIN

ART GLASS

Symmetry and structure give this design a traditional Tudor-style feel that aligns well with classic architecture.

Westin is shown on Obscure privacy glass. **No colors** are included in this design.

DISCOVER MORE

WEBSITE

ProVia.com makes it easy to explore and compare numerous door, window, siding, stone or roofing options in a straightforward, interactive way. Configure a door or window, visualize products on your home, explore color palettes, and learn about different architectural styles—all from our innovative Design Center. Save your favorite products, colors, photos or ideas throughout the site into your own ProVia® portfolio for reference any time and share them across your favorite social media platforms. ▶

VISUALIZER

Let your imagination run free with this exterior home design tool. Select from a library of existing home styles or upload a photo of your own home.

In a few easy steps, update your siding color, add stone or metal roofing, configure windows, or create a one-of-a-kind entry door system.

Looking for professionally inspired color and product palettes? Apply one of our pre-selected Designer Collections to create a curb-appealing look. ▽

APP

Use the ProVia app to configure doors and windows or select from an extensive collection of vinyl siding, manufactured stone and metal roofing styles.

FEATURES

- Door and Window Configuration
- Vinyl Siding Profiles, Colors and Accessory Accents
- Manufactured Stone Styles, Color Palettes and Grout Options
- Metal Roofing Profiles, Trims and Colors
- Videos, Photo Galleries and Catalogs
- ProVia Dealer Locator

SOCIAL MEDIA

We love seeing how you apply our products to your ▾ home. Please share your photos with us.

At ProVia, we manufacture energy efficient products and exercise corporate environmental stewardship by recycling, reducing pollution emissions and much more. In fact, our company has received repeated awards from the Environmental Protection Agency such as Partner of the Year - Sustained Excellence for Door and Window Manufacturing.
